

Information update for non-medical staff 2015

“The cervical screening experience for women is a continuum of care – from the first contact with practice staff. CervicalCheck aims to ensure that each point of contact along the screening pathway is a positive experience for women”

The information session for non medical staff will provide up to date guidance and help equip practice staff to play the important role they have in ensuring a quality cervical screening service for women.

facilitated by CervicalCheck Screening Training Unit
