

Cervical Screening results and recommendations table

HPV Test Result	Cytology Pattern (where applicable)	Code	Management Recommendation	Rationale/ Recommendation
Not Detected/ Negative	N/A	R1	Screening completed	<ul style="list-style-type: none"> Woman is aged 61 or over at date of test. Discharged from colposcopy with a recommendation of no further screening. First test at completion of increased surveillance post colposcopy and woman is aged 66 or over at date of test. Woman is aged 64 or over at date of test and has been on annual surveillance for reason of renal dialysis / post-transplant or HIV positive.
		R3	1 year recall	<ul style="list-style-type: none"> Renal dialysis Pre / post-transplant Living with HIV If increased surveillance is indicated as per colposcopy discharge (see note 1 below)
		R2a	3 year recall	<ul style="list-style-type: none"> If aged between 25 and 29 years with no requirement for or completed increased surveillance. First test at completion of increased surveillance post colposcopy - women under 66 years at date of test
		R2b	5 year recall	<ul style="list-style-type: none"> If aged between 30 - 60 years at test date with no requirement for increased surveillance (women must attend for one test at 3 year interval before moving to 5 year recall on completion of increased surveillance post colposcopy if under 66 years at date of test).
Detected/ Positive	P1 (Unsatisfactory)	R6	3-month repeat	Repeat 3 months
		R7	Refer to colposcopy	<ul style="list-style-type: none"> 3 consecutive unsatisfactory screening test results Any 3 screening test results that are not normal in previous 10 years & woman has not had colposcopy. Renal dialysis, pre / post-transplant, living with HIV
	P2 (No abnormality detected)	R3	1 year recall	First HPV positive and cytology NAD, repeat screening test in 1 year (includes women on post colposcopy surveillance)
		R7	Refer to colposcopy	<ul style="list-style-type: none"> Second consecutive HPV positive and cytology NAD taken in non-colposcopy setting. See note 2 below. Living with HIV Renal dialysis Pre / post-transplant
	P3a+ (ASCUS or worse)	R7	Refer to colposcopy	Any HPV positive result with abnormal cytology
Indeterminate HPV result	N/A	R6	3-month repeat	First or second indeterminate screening test result
		R7	Refer to colposcopy	3 consecutive indeterminate screening test results Any 3 screening test results that are not normal in previous 10 years & woman has not had colposcopy Renal dialysis, pre / post-transplant, living with HIV
Test not Processed	N/A	R6	3-month repeat	Repeat 3 months

NOTES:

- Women discharged from colposcopy pre-March 2020 for cytology screening who receive a HPV negative result do not require continued annual surveillance unless there is a history of invasive cervical cancer/CGIN/AIS/SMILE. Women discharged after March 2020 should attend for their recommended number of post colposcopy HPV tests.
- Disregard intervening cytology only, indeterminate, unsatisfactory result.
- When current clinical details record Post Coital Bleeding (PCB) / Intermenstrual Bleeding (IMB) / Post-Menopausal Bleeding (PMB) or it is recorded on the screening form that the cervix is suspicious, it is recommended to refer to a gynaecological specialist.
- Where there is a cytology result:** If there are endometrial cells present and woman is over 45 years it is recommended to refer to a gynaecological specialist.
- Where there is a cytology result and a previous history of treatment for glandular abnormality:** Report as UNSAT if TZ cells are not present.
