Colposcopy Algorithm 2
Management of people with HR-HPV positive and high grade abnormal cytology or any glandular abnormality (including Atypical Glandular Cells)

* use clinical judgement: e.g. in cases of young person with AGC (8a) – conservative management may be appropriate
** if no biopsy taken the reason should be recorded e.g. pregnancy, patient declined etc. Pregnant woman with no suspicion of invasion should be reviewed at end of 2nd trimester and 3 months postnatal

Note: If colposcopy is low grade and no treatment is performed multiple biopsies should be taken where possible
